

My impact on my community

By: Marlon Jones Jr

Hi, I'm Marlon Jones Jr; I live in Garden City, Michigan. I'm typing this to tell you how I impact my community. In Garden City people usually don't litter so I can't help with that but I can help out with raking leaves, shoveling snow, and sometimes if even cutting grass! I help out my neighbors by shoveling/plowing the snow for them when I know they don't have time to do it. I sometimes even put salt down for them! I don't do this for money. I actually do this for volunteer hours for the club I'm joined in! The National Junior Honor Society. In the National Junior Honor Society we go to senior citizen homes and try to help out the best we can. We also go to animal shelters to try to help out with the cats and dogs to lift stress off of the workers. I'm actually trying to get a free tutoring system started at my school Tipton Academy. Its going to be for grades 4-8 from 3:35pm-4:30pm. The reason why its only for grades 4-8 is because we have to campuses for our school, our east campus is from grades pre-k- 3rd. So we think that it would be an inconvenience for parents to have to bring their child from one building to the next. When for the 4-8 graders they can just stay at the school for the tutoring to happen! I help my community and others should too!
